IDEATION

TEAM ID: PNT2022TMID30665

PROJECT TITLE NAME: NEWS TRACKER APPLICATION

The Three Ideas Which are prioritized By the team are as follows:

1) By using media cloud we can collect news *, a massive dataset for storing news and we can use UI/UX design, which can be created using HTML, CSS, Bootstrap, Javascript, Flask, and SqlLite and we can deploy it using IBM cloud.

2) There are so many feeds for collecting news, for example, cloud tech RSS cloud and also we can monitor the news using monitoring services and create an app using web development and deploy it in the cloud and we can feed the news using cloud storage.

3) News Tracker can be implemented by creating an Application using HTML, CSS, Bootstrap, Javascript, and Flask*, storing news we can use Cloud (Google, IBM, Microsoft).
